Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over de Clereq et al. (US 7,154,428).

Regarding claims 1-4, de Clereq discloses all the features of the instant invention except the indicator light is positioned under the power key as claimed. Instead, the indicator lights are only assigned to three pay per view buttons (220, 222, 224). However, de Clereq does teach that the many different layouts and configurations can be constructed by rearranging the key matrix circuit, the key contact areas, and the LEDs (note col. 5, lines 20-25). Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to place a LED under the power button to perform the well known functions as claimed. As suggested by de Clereq, such arrangement is considered a matter of obvious design choice.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
